

Courses are available for both
PLUMBING
and
HVACR

Employee success and retention are key — PHCC Educational Foundation offers a suite of online training products that provide a scalable, cost-effective workforce education pipeline for technicians.

Built for contractors by contractors

Workforce Readiness

A free online introductory course that gives prospective plumbing and HVACR industry workers an opportunity to learn more about the p-h-c trade before choosing a career path.

Fast Track to Service & Repair

Comprehensive entry-level training for technicians who do residential or commercial service and repair work. Courses are intended to train technicians to be job-ready and well-rounded with a good understanding of plumbing and HVACR systems, and are most successful with the supervisor's involvement in hands-on practical skills training.

Pre-Apprentice

An affordable introductory course designed to help technicians diversify their skillset as helpers, and prepare for success in a suitable training program.

Apprenticeship

Related technical instruction (RTI) to provide apprentices who cannot attend traditional classroom-based instruction with the same opportunity to learn the textbook fundamentals of the trade.

This training course must be supplemented by an employer, through both technical assistance and on-the-job training in each area of instruction in the book.
